質性研究 Qualitative Research

一、課程說明

本課程旨在培養學生具備閱讀質性研究文獻、設計質性研究計畫、收集與分析質性資料、及評值質性研究文獻。課程除介紹質性研究內容外，並討論常運用於護理的理論與研究法及資料分析法。學生亦會練習質性研究資料蒐集與轉譯技巧。

The purpose of this course is to equip students with the ability to read, design, collect and analyze qualitative data, and evaluate qualitative research literature. In addition to introduce components of qualitative research, commonly used research approaches in nursing and methods of data analysis will be discussed. Students will practice skills of data collection and analysis in qualitative research.

二、教學目標

1. Specify differences between qualitative and quantitative research.
2. Identify and describe characteristics and components of qualitative research.
3. Compose problem statement.
4. Describe commonly used research approaches in nursing and their underpinning philosophy.
5. Practice qualitative data analysis of collected data.
6. Understand validity, trustworthiness, and rigour of qualitative research.
7. Evaluate qualitative research.
