

## 婦女健康專業研討 Women's Health Care

### 一、課程說明

本課程旨在增進學生婦女照護的專業能力，學生能透過各種不同面向提供婦女健康照護。課程將依婦女各發展階段的健康議題、需求、及關注作探討；課程並將介紹適合運用於婦女健康照護的理論。其他與婦女健康相關的健康計畫、服務或政策，以及婦女健康相關研究亦將在課程中討論，將研究結果轉譯至照護措施、健康計畫或健康政策中為學習重要成果。

This course purposes to enhance students' professional competence in caring for women in various aspects. The course is designed to examine health issues, needs, and concerns of women across the life span. Theories that can be applied in women's health care will be introduced. Health programs, services, or policies that affect women's health and research issues about women's health will be discussed in the class as well. The translation of research results into interventions, programs, or policies is of major interest.

### 二、教學目標

1. Understand current women related programs, services, or policies and how they affect women's health.
2. Identify and analyze contemporary issues affecting women's health and healthcare.
3. Understand methodological issues in women's health research and their affects in interpretation of research data.
4. Identify major factors that influence women's health across life span.
5. Evaluate and apply theories in women's health care.
6. Interpret and apply research results into healthcare practice.
